

SEND FREE MESSAGES TO THE RIGHT PEOPLE VIA BLUETOOTH AND WI-FI

Recently deployed by Metropolitan Police Homicide Teams, this system is an innovative, cost-effective way of getting your message across:

Can contact every Mobile or Smart phone within a focus area.

Accurate information taken away.

Free to send and receive.

Can send images, videos, mp3s, documents, etc.

Simple-to-use point and click management interface.

Automatically measures success.

Content sent can be shared with friends, colleagues, etc.

Works with any network.

Complements existing means of communication.

Jibajaba currently offers two basic models of wireless messaging system, the Jibajaba Access Point and the Jibajaba Access Server, both of which come with full Bluetooth and Wi-Fi communications as standard.

The Jibajaba Access Point is a small device, suitable for waiting rooms, etc. The Jibajaba Access Server is a larger, more powerful device which will handle a high throughput in a short time.

Either system can be fitted with a heavy-duty battery for use in areas where power is not readily available.

Please contact us for more information or to arrange a demonstration:
